

Ruibiya Steel | Precision Fabrication, Reliable Delivery.

Customized Steel Structure Solutions for Industrial, Commercial and
Infrastructure Projects.

ZhenJiang Ruibiya Technology Co., Ltd.

www.ruibiya.com

Company Profile

Ruibiya Steel, has developed from Taidefeng's steel fabrication business, is a professional manufacturer of high-performance steel structures and custom components, with 23+ years of experience serving clients in over 18+ countries. We provide engineered solutions for logistics centers, industrial workshops, commercial and agricultural buildings.

Our core strengths are precision manufacturing and reliable delivery. With advanced equipment, international certifications (ISO 9001, EN 1090, ISO 3834), and a disciplined production system, we ensure every structure meets strict quality and dimensional requirements, and arrives on schedule.

Ruibiya Steel is your trusted partner for steel structures built with precision and delivered with reliability.

23+ Years

Manufacturing Experience

40000+ m²

Factory Area

25000+ Tons

Annual Production Capacity

30+ Sets

Production Equipment

400+ Projects

Project Experience

Strict QC

Quality Control System

Drawing Review

Quality Inspection

Packing & Delivery

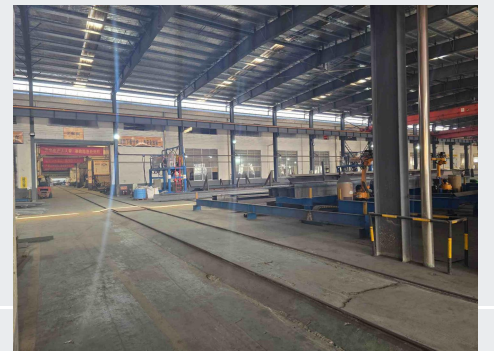

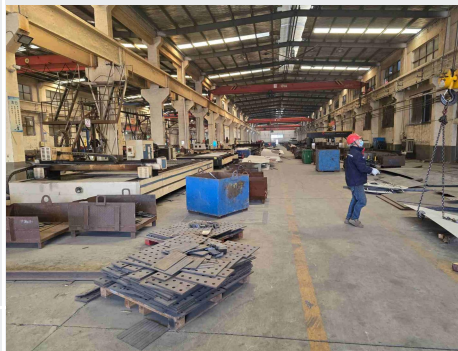

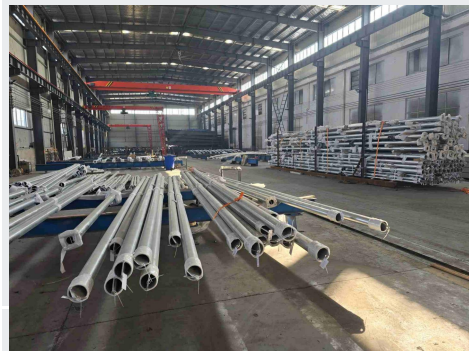

Customized Fabrication

Documentation

Project Support

Workshop

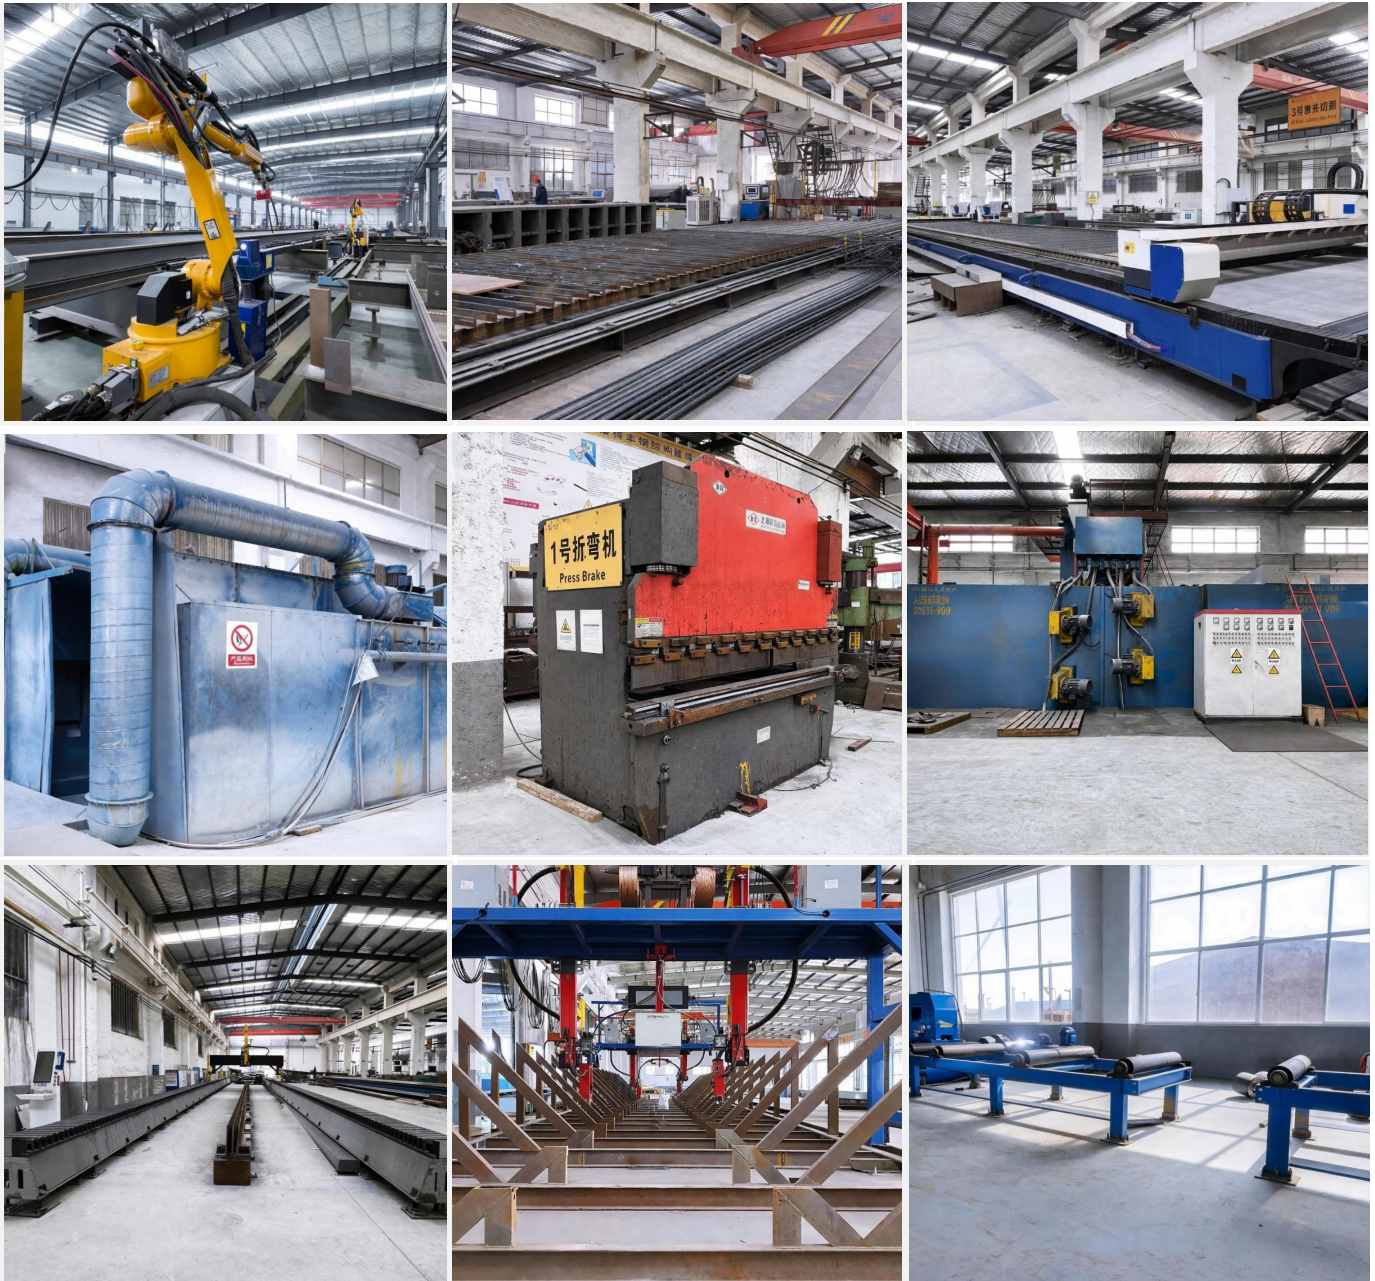

Our workshops are organized for steel structure fabrication, covering material preparation, cutting, assembly, welding, drilling, surface treatment and packing. With experienced workers, overhead cranes and dedicated production areas, we are able to handle both standard steel buildings and customized project components with stable quality and controlled delivery schedules.

Manufacturing Capability

Ruibiya Steel provides integrated fabrication capability for customized steel structure projects, covering cutting, assembly, welding, drilling, shot blasting, painting and export packing.

Our production system is built around drawing-based fabrication, dimensional control and organized workflow. From individual steel components to complete building structures, each order is processed according to project drawings, technical requirements and delivery schedules.

Cutting

Welding

Assembly

Drilling

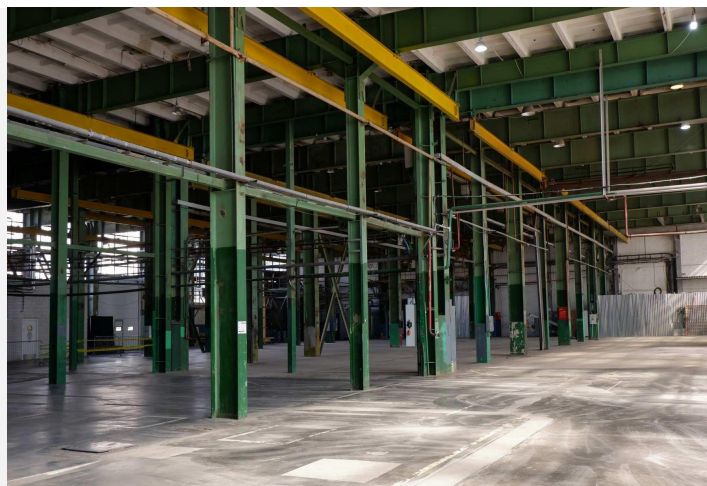

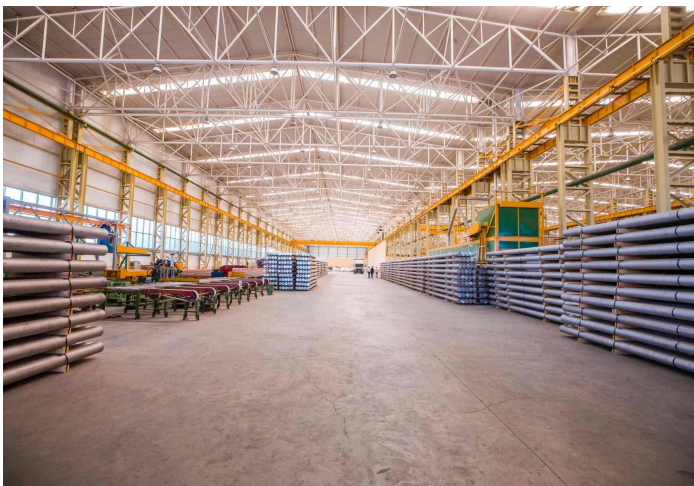

Shot Blasting

Surface Treatment

Painting

Packing

Steel Structure Warehouses

Ruibiya Steel fabricates warehouse structures according to customer drawings, storage requirements and site conditions. We focus on large-span space, accurate connections, efficient steel consumption and easy on-site installation for overseas projects.

Customization Focus

Large-span Layout

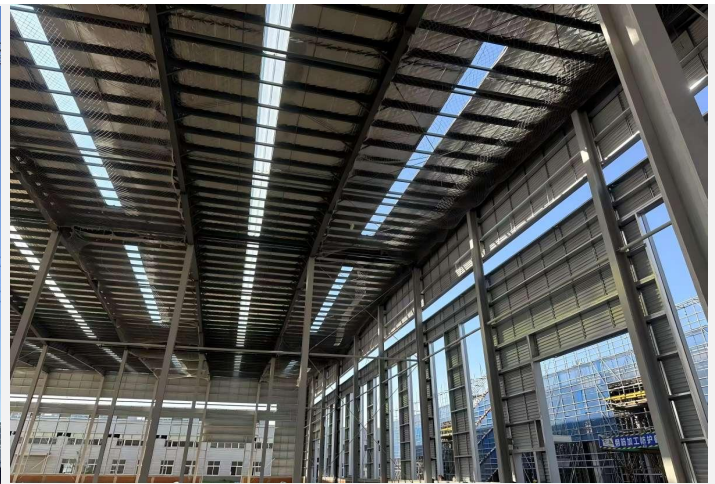

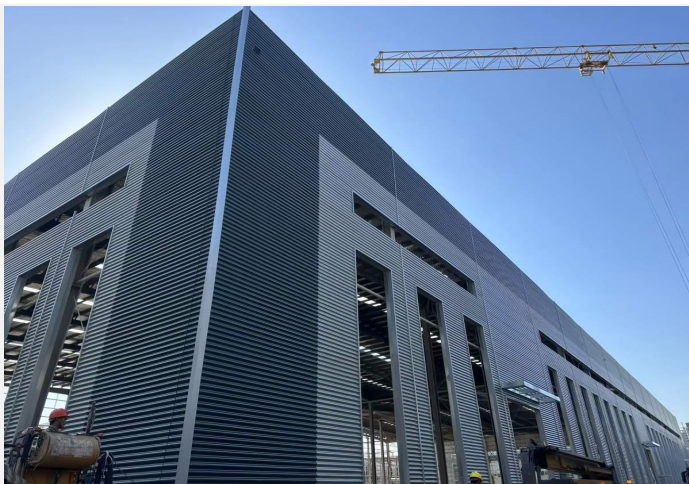

Clear Height & Bay Spacing

Roof and Wall Support System

Door and Opening Details

Export Marking & Container Loading

Steel Structure Factory Workshops

Ruibiya Steel fabricates factory workshop structures based on production layout, equipment arrangement, crane load and expansion requirements. We pay attention to column spacing, crane beams, bracing systems, roof support and connection accuracy.

Customization Focus

Crane Beam and Runway System

Single-span or Multi-span Structure

Production Layout Requirements

Roof Ventilation and Skylight Options

Heavy-duty Connections

Steel Structure Platforms and Mezzanines

Ruibiya Steel fabricates steel platforms and mezzanine structures for storage, equipment support and elevated working areas. Each structure can be customized according to load capacity, floor system, column layout and site installation requirements.

Customization Focus

Design Load Requirements

Bolted Assembly Details

Stairs, Handrails and Guardrails

Steel Grating or Floor Plate Support

Integration with Existing Structures

Space Frame Domes

Ruibiya Steel fabricates space frame members, nodes and dome structure components according to project drawings. We focus on member accuracy, node positioning, bolt-hole alignment, surface protection and organized packing for large-span installation.

Customization Focus

Node and Member Accuracy

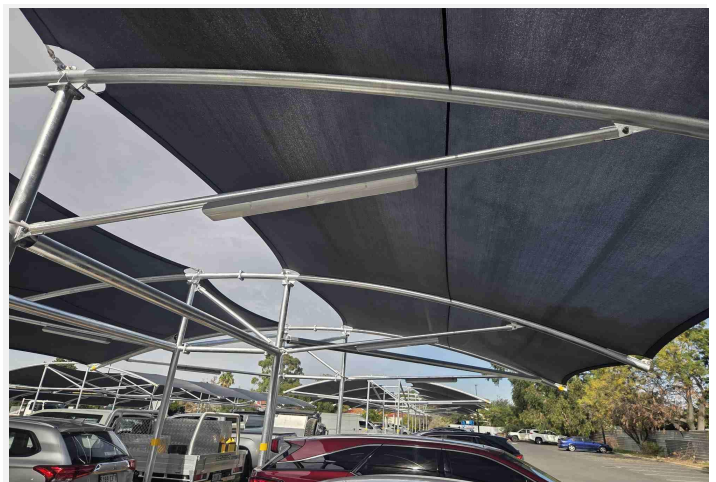

Large-span Geometry Control

Bolt-hole Alignment

Surface Protection

Zone-based Packing and Marking

Steel Structure Carports

Ruibiya Steel fabricates customized steel carport structures for parking areas, commercial facilities and shelter systems. Frames can be manufactured in single-bay, multi-bay, cantilever or modular designs with suitable surface treatment for outdoor use.

Customization Focus

Single or Double Cantilever Frames

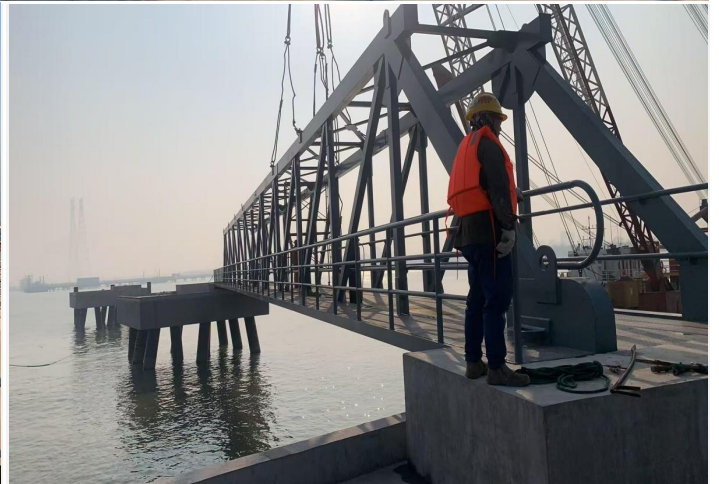

Modular Parking Layout

Roof Support and Drainage Details

Painting or Hot-dip Galvanizing

Solar-ready Structure Options

Steel Structure Bridges

Ruibiya Steel provides fabrication for steel bridge components and related structural systems. We support truss sections, welded beams, cross frames, railings and other bridge elements with accurate drilling, welding, inspection and segment marking.

Customization Focus

Welded Beam and Truss Components

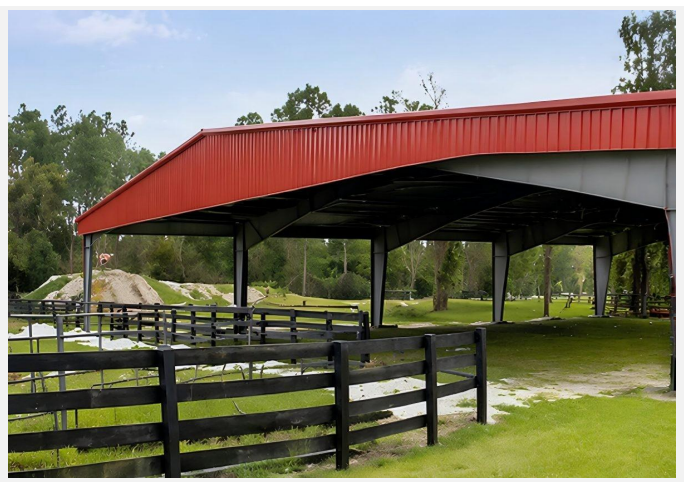

Accurate Hole Positioning

NDT Inspection Requirements

Protective Coating Systems

Segment Marking for Site Assembly

Steel Structure Livestock Facilities

Ruibiya Steel fabricates steel structures for agricultural and livestock facilities with a focus on durability, ventilation, easy maintenance and cost-effective construction. Structures can be customized for open-sided buildings, enclosed sheds or modular farm use.

Customization Focus

Open-sided or Enclosed Layout

Ventilation and Roof Structure

Corrosion-resistant Surface Treatment

Simple and Fast Assembly

Cost-effective Modular Frames

Steel Structure Exhibition Halls

Ruibiya Steel fabricates large-span steel structures for exhibition halls and public buildings. We focus on structural accuracy, visible steel details, roof systems, façade connection points and clean fabrication quality for architectural projects.

Customization Focus

Large-span Roof Structures

Exposed Steel Appearance

Façade and Curtain Wall Interfaces

Curved or Special-shaped Members

High Dimensional Accuracy

Other Custom Steel Structures_A

Ruibiya Steel supports custom steel structure fabrication based on customer drawings and technical requirements. We manufacture heavy steel frames, welded assemblies, pipe structures, special-shaped components and project-specific steel elements.

Customization Focus

Drawing-based Fabrication

Heavy Steel Components

Special-shaped Steel Structures

Welded Assemblies

Project Documentation and Marking

Packing & Delivery

Steel components are packed, marked and loaded according to project drawings and shipping requirements. We use clear part numbers, bundle packing, anti-rust protection and organized container loading to help customers identify components easily during site installation.

Certificates & Contact

Certificates

Ruibiya Steel maintains internationally recognized certifications for quality management, welding control and structural steel fabrication. These certifications support consistent production quality, traceable documentation and reliable delivery for overseas steel structure projects.
